

Clean Click Connector Cleaner

V.3.0

Description

The Optronics Clean Click connector cleaner is a high-performance device designed for cleaning ferrule end faces of $\varnothing 2.5\text{mm}$ or $\varnothing 1.25\text{mm}$ connectors. As well as enabling cleaning of connectors residing in adapters patch panels and faceplates, the Clean Click also comes with an adapter to clean unmated connectors.

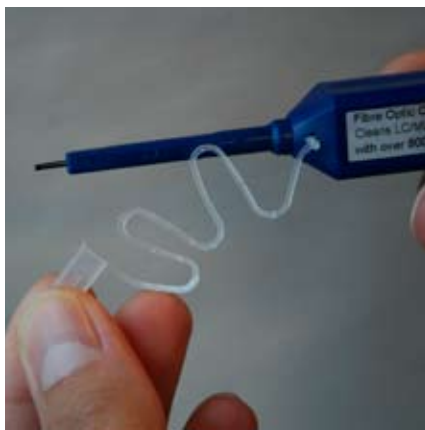

The tool houses an optical grade cleaning strand. With each mechanical push action a fresh section of the strand is advanced, gently sweeping and cleaning the ferrule end face. An audible "CLICK" will indicate a completed cleaning cycle.

Features/Benefits

- ▶ Cleans both UPC and APC ferrules
- ▶ Adaptor / dust cap supplied for cleaning unmated connectors
- ▶ Available for both 2.5mm (SC, FC, ST) and 1.25mm (LC, MU)
- ▶ Up to 800 cleans per unit - low cost per clean
- ▶ Audible "click" confirms a completed cleaning cycle
- ▶ Extendable to clean deep-recessed connectors
- ▶ Dry cleaning solution – no risk of residue
- ▶ Clean connectors without the need to remove them from adapters, panels or faceplates

Simple 3 Step Process

Remove the guide cap

Insert the tip into the adapter

Push the outer shell to clean connector end face. A "click" indicates the end of cleaning
